

VAIBHAV AGGARWAL

Head of AI Practice · ServiceNow AI Specialist · Senior AI Architect

London, UK · vaibhavcssbb@gmail.com · +44 7765 681805 · [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Senior AI leader who designs and personally builds enterprise AI on ServiceNow. Twenty years of enterprise delivery across UK, India, and the UAE — including a \$5M global HR transformation at AXA XL across 15+ countries, a Head of Digital Operations role at Deem Finance in Dubai, and the AI practice at AI Digital where I have shipped seven named AI products. Selected by ServiceNow into their Customer Excellence Group as a Senior Technical AI Consultant. MSc in Machine Learning & AI, Lean Six Sigma Black Belt, and a production algorithmic trading platform built on the side.

CORE COMPETENCIES

ServiceNow AI: Now Assist · AI Agents · AI Search · Virtual Agent · Predictive & Task Intelligence · Document Intelligence · Workflow Data Fabric · Skill Kit · Studio · Flow Designer · IntegrationHub · ATF

AI Engineering: Agentic AI architecture · LLM APIs (Anthropic · OpenAI · Gemini) · n8n · Make.com · Cursor / Claude Code · Python · FastAPI · Next.js · TypeScript · AWS · GCP · Azure

Practice Leadership: AI Readiness Frameworks · Maturity Assessment · Use-Case Prioritisation · CoE Design · Governance & Responsible AI · Change Management (ADKAR) · Lean Six Sigma Black Belt

PROFESSIONAL EXPERIENCE

AI Digital (Octahedron Group) · London, UK

2024 – Present

Head of AI Solutions & Products

Lead the AI practice at a UK consultancy specialising in ServiceNow-native AI. Built the practice from scratch — defined the service portfolio, productised seven named offerings, structured the engagement model, trained the team from CEO to analyst, and run all senior client engagements end-to-end.

AI products designed, built, and shipped:

- **Dev Accelerator** — Autonomous SDLC AI platform with seven AI roles (BA, Tech Analyst, Developer, Tester, Release Manager, Tech Writer, PM). Takes a stakeholder requirement through to release artefacts; cycle time for a business analyst drops from six-to-ten weeks to two-to-three days. Live in client pilots today.
- **Knowledge Quality Accelerator** — Built on ServiceNow's Now Assist Skill Kit. Audits knowledge articles against ten AI-readiness criteria and generates ready-to-use rewrites. Business case: £150–250K annual saving from 10% ticket deflection on a 100K-ticket enterprise.
- **AI Readiness Framework** — 72-check, 6-domain assessment producing a 12-month activation roadmap. Identifies dormant AI features and quick wins requiring no additional licensing. Delivered to enterprise clients including Kenvue.
- **SpringBoard** — Library of 54 pre-built production AI agents across ITSM, HR, Finance, Legal, Procurement, Insurance, and Public Sector. 2–4 week POC-to-production deployment model.
- **Production AI agents shipped to clients** — GenAI Knowledge Article Reviewer (500+ person-days saved annually); AI Discovery Intelligence Agent (80–90% pre-call research reduction); Validata.AI data-quality platform (99.8% validation accuracy); Incident Quality Analyst (ITSM); Candidate Onboarding & PTO Self-Service (HRSD); Invoice Remediation (P2P); User Story & Test Script Generator (SDLC).

Selected client engagements personally led:

- **Kenvue (J&J consumer-health spin-off, 22,000 employees)** — Led AI Readiness assessment and the Knowledge AI Check engagement. Delivered measurable deflection within 90 days; handed over a self-sustaining Centre of Excellence.
- **Tropic.bio** — Built and led development of the totalRNA Atlas application end-to-end (Python, FastAPI, GCP, OpenAI) for genomic data analysis.
- **TQ IMA Agentic Launchpad** — Built multiple production AI agents inside TQ IMA's flagship Agentic Launchpad product; supported pre-sales demonstrations.
- **Bain & Co (Tech Services Group, via TQ IMA partnership)** — Delivered CMDB maturity assessment surfacing the data-quality work required for agentic AI to scale.
- **Bradford City Council** — Led AI opportunity identification across twelve council service areas.

ServiceNow Customer Excellence Group: Selected by ServiceNow as a Senior Technical AI Consultant following a competitive interview process across the global partner network.

AXA XL (XL Catlin Services SE) · AXA XL India office; London, UK

Nov 2020 – Sep 2024

Global HR PMO Lead

Joined AXA XL's India office in November 2020 on a UK relocation agreement; transferred to AXA XL's UK entity in August 2021 once the visa was granted. Owned the programme management spine of a \$5M AI-enabled global HR transformation across 15+ countries.

- Owned \$5M global HR transformation across 15+ countries — cross-functional delivery teams, VP and C-suite sponsors, third-party delivery partners.
- Designed and deployed intelligent automation and AI-enabled HR workflows; measurable improvement across cycle time, case deflection, and employee satisfaction.
- Full programme governance, risk, benefits realisation, and steering-committee reporting across multiple geographies and time zones.
- Established a Centre of Excellence model for sustained AI and automation capability post-programme.

Deem Finance · Dubai, UAE

Jan 2020 – Jul 2020

Head of Digital Operations Transformation · Reporting to CTO · Team of 12 · \$15M budget

Hired to lead the shift to a fully digital financial-services operating model — automating labour-intensive processes, modernising operating model, enhancing scalability and reliability.

- Customer-onboarding and credit-underwriting automation — 30% reduction in manual workload.
- Multi-cloud infrastructure deployment — 99.9% uptime.
- Process and cost optimisation — 20% operational cost reduction in year one.
- Vendor rationalisation and lean operations — 10% HR cost cut, 15% end-to-end efficiency improvement.

AXA Business Services (GBS) · Pune, India

2015 – Dec 2019

Senior Manager, Process Automation & Optimisation

Built and ran the automation function from scratch across AXA's largest Global Captive Centre — P&C Insurance, Life, and Healthcare globally.

- Governed €3.3M / ~250 FTE enterprise efficiency programme end-to-end — benefits realisation, resource allocation, financial reporting.
- Led a team of 12 (Six Sigma Black Belts and developers); served as P&C CoE Product Owner for RPA.
- Generated \$2M in revenue by leading go-to-market for AXA's Operational Excellence Consulting service line.
- Delivered E2E transformation programmes for 13 global entities — AXA UK RTR (€120K saving), AXA UK Subledger (€200K saving), AXA Singapore Claims (9 FTE saving), and others.
- 14% CSAT improvement through customer-centric process redesign. Built the Process Excellence training curriculum (Six Sigma, Lean, RPA) deployed across AXA GBS and AXA US.

Earlier Career · Pune & Trivandrum, India

2004 – 2015

Eleven years in regulated financial services and global GCC operations — establishing the process excellence, regulated-environment delivery, and large-team leadership foundations underpinning all subsequent transformation and AI work.

- **A.P. Møller–Maersk** — Manager, Process Excellence (Mar 2013 – Feb 2015). Deployed P2P / A2R frameworks across India, Philippines, China; led Master Black Belt P2P transformation.
- **BNY Mellon** — Assistant Manager, Reengineering (Mar 2011 – Mar 2013). Settlement matching tool (27% cycle-time reduction); data archival software (\$330K savings); 550-employee Six Sigma training programme; direct interface to CEO, CAO, CFO.
- **WNS Global Services** — Assistant Manager, Business Process Excellence (Jun 2006 – Mar 2011). Led 25-person GCC operations team in Life and Pensions; mentored 300+ improvement ideas (\$57K savings); Six Sigma and Lean training to 225 employees.
- **Allianz Cornhill Information Services** — Team Leader, Operations (Jul 2004 – May 2006). Led UK-to-India process migration for Insurance Credit Control; trained and certified India team of 16.

PERSONAL PROJECTS

AI-Powered Algorithmic Trading Platform · Personal Build

Ongoing

End-to-end production trading system built from scratch. TradingView signal generation → Python execution engine → Interactive Brokers (IBKR) API for live order management. Runs concurrent strategies with independent configuration and risk rules. LLM-driven natural-language strategy interface. ML pipelines for market-regime classification, sentiment scoring, and catastrophic-event detection. Full Sharpe / drawdown / expectancy analytics and a backtesting engine.

Stack: Python · TradingView Lightweight Charts · IBKR API · LLMs (OpenAI / Anthropic) · scikit-learn · REST APIs

EDUCATION

- **MSc Machine Learning & AI** — Liverpool John Moores University, UK
- **PG Diploma Machine Learning & AI (Specialisation: Generative AI)** — IIIT Bangalore, India
- **PG Diploma IT Management** — Symbiosis University, India
- **BCA Computer Application** — Pune University, India
